Proposal for Scholarship 2019

To :

The board of the Foundation Kleinschalige Projecten Indonesië *

Meijhorst 61-04

6537 L J Nijmegen, Netherlands

Dear Mr. Anton,

Realino foundations are still consistent in seeking scholarships for poor children. As long as we accompany poor people and we are very sure that education is the most important factor to alleviate them from poverty. If we want to alleviate the children from their poverty, we need to give them adequate education. As long as we accompany the poor in various activities, it is very difficult for them to make planning, creative thinking, persevering and they do not aware the important of education. All these aspects trained in school.

On 2018 we have some activities with the poor and confirms us the importance of education. We want children do not enter in the circle of poverty that never ends because they don't have education. In the city, there is a circle of poverty. We will find poverty that has passed from generation to generation because of lack of education. They can survive because they do simple job, such as: beggar, street seller, scavenger, etc. That work only enough for live, they cannot send their children to school. Finally, after their children grow up, they will do the same thing, continuously from generation to generation.

We will find something different in the villages. In the villages, poverty means the people that do not have assets, such as: fields, livestock, etc. They work as farm workers who have very small income. They can survive but they don't have the cash that needed to send their children to school. Some of them sometimes go to the city to find work but only as unskilled laborers whose income is also very small. Children from poor families often drop out from their school and helping their parents work in the fields. this also causes poverty from generation to generation.

* SKPI is Stichting Kleinschalige Projecten Indonesië (Foundation Small Scale Projects Indonesia)
KvK: 53956168.
RSIN: 8510 89 136

Realino still want to help children from poor families, both from the city and from the village to stop the circle of poverty. Because of our limitations, we still need help. So, again, we invite the board of the SKPI to support us by give scholarship to the poor children. Through your help and support, we can send more and more children to go to school, giving them hope for the better future.

Hopefully, you will support our project by give us funds and we will distribute that fund to the poor children. May God give health and blissfulness to you all.

II. Project

1. Organization

Realino Foundation has two projects. First, distribution of scholarship for the poor children from the donor as a main project. Second, empowerment project for the poor; street children, homeless, etc. We also initiatives workshop/training in woodworking and welding for the young people and accompanying children in the slum.

The aim of the main project is; education for the poor children. All Children have their rights to get education to prepare their future. The problem is that many children still cannot go to school because of the economic condition. The government has been trying to pay attention with various assistance but there are still many children who don't have access to get the assistance.

Based on that awareness, the strategies to perform this project are:

- Finding donors (from communities, institutions or individuals) and we offer the rich families to be foster parents of the poor children. We attempted to provide complete data so that donors are sure that they are helping the poor child.

- Working in a team. We involve volunteers which are university students who around the time of application (June) would usually be in their semester break. During the semester break, they usually go back to their hometown. We ask them to observe and interview applicants for our scholarship program from their own village. They use a form of observation and interviews that we specify. So it is possible to visit the scholarship applicant one by one.

2. Description of the project

All children have rights to get education, especially the poor. Through education, people will have bigger chance to make a better future. This awareness makes us try to find donors to pay the schools tuition for that poor student.

In my proposal (2019), I have targeted to give scholarship for 430 students and I requested SKPI to support 200 students from 430 students we targeted. We try to get donation from local donors for 230 students. We are grateful that in 2018 it could involve more and more foster parents and local donors. We estimate average school fees based last semester tuition. We have estimation for elementary is Rp. 365.000/semester, junior school is Rp. 600.000/semester and for the vocational high school is Rp. 900.000/semester.

In 2019 we will modify the registration schedule. Usually we open registration on 1-20 June. But because there is Idul Fitri celebration on the 4th-5th of June, we will postpone the registration schedule on 10th-30th of June, and all applicants will be selected (observation and interview) and announced on July 25. We postpone registration but cannot postpone the announcement because children have to pay for school tuition. For that, we have to work harder and need more volunteers. We will prepare everything so the process can run smoothly.

In the process of registration, we can't predict how much new applicant will apply, in what grade they are, and how much the school tuition. So the estimation can be missed. If it happened, we will adjust the number of children to be assisted.

We also interviewed parents to find out the most appropriate scholarship form we could provide. Most of the parents asked support only for school tuition. But, some parents also need more support. They also asked support for books and school uniforms. The proposal that we give to you is scholarship that is only for school tuition.

We tried to involve schools and parents to determine the amount of scholarships will be given. Because of these considerations, the scholarship amount will be different. Differences in the amount of scholarships are based on several considerations:

- Depending on the School Committee.

In 2019 there is no significant change in government policy in terms of school tuition. School committees still play an important role in determining school tuition. The different amount of the scholarship actually depends on the kind of school, either public or private school. First, usually the school tuition of private school is more expensive than public school. Second, to decide the school tuition, the government asked each school to make the “school committee”. The School Committee consist of several element; representatives of teachers, parents, advisory, government, etc. The School Committee will consider and decide the school policy, including school tuition, payment of books, uniforms, etc. So each school can make a different decision about the tuition.

- Depending on the condition of the parents.

Our scholarship program do not merely support parents to pay school tuition. We also asked contribution from the parents. We encourage parents not to solely depend on us, but they should strive to contribute to the education of their own children. No matter what or how much contribution they can give, the most important thing is their effort to support their children. Some parents can contribute 25% of the school tuition. Some parents can provide uniforms and books for their own children.

- Depending on the results of observations and interviews.

We base our decisions of the amount of the scholarship given on the observations and interviews with the applicants and the parents. If we realize that the parents need more support, we will try to give more. But if according to observations and interviews the parents have capability to give contribution to their children, we asked them to give a contribution.

3. Purpose and Aim

Targets of this project are poor children can complete primary education (elementary and junior high school) and gain skills from vocational schools. We have targeted 430 children from elementary schools to vocational high school and 6 young people undergoing training in the workshop.

There are many things that unpredictable when accepting scholarship applicants:

- The school tuition

Every year we have discussed with the school and parents to decide the scholarship we will give to the student. Nonetheless, we have to estimate the school tuition. We have estimation for elementary is Rp. 350.000/semester, junior school is Rp. 600.000/semester and for the

vocational high school is Rp. 900.000/semester. We prioritize donations from SPKI for elementary school students and junior high school student.

- The applicant

Every year, we can't predict how much student from elementary, junior high school and vocational high school student will apply. In 2018, we have a target to receive 430 applicant. We did not impose the number of the candidates based on the targets but based on selection. After selection process, we received 384 children. From 384 students, SKPI helps 224 student; 89 elementary, 83 junior high school and 52 vocational school student.

In 2019, we have a target to give scholarships to 430 children. From that number, we asked SKPI to support 200 children, the rest, we will look for local donors. We invite local institution and individual to support these children through some programs; foster parent, peer helper, etc. We attempts to involve local donors also encourages them to care to the poor.

4. Planning

The project will be for one year and will be annually renewed.

5. Evaluation

Evaluation is done by academic result of scholarship recipients. Evaluation for the training workshop is done by observing workshop productivity; more productivity means more skilled trainees.
