Dear Mr. Anton and Mrs. Anneke,

According to the data from UNICEF on 2014, more than 2.5 million children (7-15 years old) in Indonesia can't continue their study because of the high of the cost for education. According to data from *Ministry of National Education*, only 21% high school students can finish their study, the rest can't continue because of the economic condition. In Jogjakarta, the higher poverty number can be found in Gunung Kidul (Wonosari). In that area, more than 1000 students can't continue their study because of the economic condition. In Central Java, according to the local newspaper, 23.000 children don't have access to school because of their poverty. That condition is very bad if we remember that education is one of the rights that children should receive.

The effects of this condition are the number of street children and criminality became higher. Furthermore, there are a lot of children worker (15-18 years old), because of the economic condition they have looking for job for life. In Jogjakarta, there are a lot of street children that begging money in the crossroad and live with their parents in slum areas. The children grow up in the condition that not appropriate for them physically and psychologically.

This condition, encourage us, Realino Foundation, to make some efforts. We make effort to send the children to school so that they can have better future. Through education, children have wider perspectives so that they can plan their own life and have more chance to make better future. Without education, people only have narrow minded that make a lot of social problem.

Realino Foundation try to facilitate the poor children go to schools, but we aware that we can't do this project alone, so we invite anyone (individual or institution) to support our concern. We also invite Mr. Anton and Mrs. Anneke to support us by give scholarship to the poor children. Through your help and support, we can send more and more children to go to school, giving them hope for the better future. With a good education, social problems (poverty, street children, child labor, etc.) will also be reduced.

Hopefully, you (Mr. Anton and Mrs. Anneke) will support our project by give us funds and we will distribute that fund to the poor children. May God give health and blissfulness for Mr. Anton and Mrs. Anneke.

## II. **Project**

### 1. **Organization**

Realino Foundation has two projects. First, distribution of scholarship for the poor children from the donor as a main project. Second, workshop/training in wood and iron for the young people so they have skills to find job.

The aim of the main project is; education for all, not only for the rich but also for the poor. All Children have their rights to get education to prepare their future. The problem is, many children still can't go to school because of the economic condition.

The strategy to perform this project is by looking for donor (community, institution or individual) and we offer the rich family to be a foster parent for the poor children.

## 2. Description of the project

The purpose of the project is: Education for All. Education is not only for the people who able to pay but also for the poor. All children have rights to get education. Through education, people has bigger perspectives, they also have a bigger chance to make a better future. We are aware that some young people don't have capability to go to the formal school. That's why we make workshop to give young people skill to work.

## 3. Purpose and Aim

Targets of this project are poor children. Indonesia is a developing country. There are still many poor families that need help to send their children to school. The poor children we want to reach in this project are the children in the poor regions around Central Java and Jogjakarta. We have targeted 450 children from elementary schools to vocational high school and 15 young people undergoing training in the workshop.

## 4. Planning

The project will be for one year and will be annually renewed.

## 5. Evaluation

Evaluation is done by academic result of scholarship recipients. Evaluation for the training workshop is done by observe workshop productivity, more productive mean more skilled.
